

Mykyta Kryhin

Business Analyst | Product Analyst | Data-Driven Operations

✉ [email] | ☎ [телефон] | 📍 [Ukraine, on-site/ hybrid] | 🔗 [LinkedIn](#)

PROFESSIONAL SUMMARY

Analytical and client-oriented IT professional with 4 years of experience in IT service operations and internal technical support within a business environment. Experienced in troubleshooting business applications and IT infrastructure, documenting recurring issues, supporting users, and helping maintain reliable day-to-day operations.

My experience has developed a strong interest in the intersection of technology, business processes, and problem solving. I am currently transitioning toward Business/Product Analytics and Product Operations, building practical foundations in SQL, data analysis, product management, and process modeling.

I hold a higher education degree in IT and have additional academic and self-directed experience with requirements analysis, BPMN/UML process modeling, and software product development. I am particularly interested in roles where I can combine my technical background, analytical thinking, understanding of business systems, and ability to learn quickly to help teams solve operational and product-related problems.

Currently developing skills in SQL, data analytics, product management, and AI applications, with a long-term interest in product development, process improvement, and AI adoption.

CORE COMPETENCIES

Business Requirements Gathering • Process Mapping (BPMN/UML) • Stakeholder Management • Data Analysis & Reporting • Root Cause Analysis • SQL Querying • Process Automation • Cross-Functional Coordination • Product Discovery & Customer Development • Documentation & SOPs • Agile/Scrum Fundamentals • Project Coordination (WBS, Gantt) • Prototyping & MVP Validation • Presentations & Stakeholder Pitching

TECHNICAL SKILLS

Data & Analytics: SQL (intermediate), Python (basic), Data-Driven Decision Making, Google Data Analytics stack

Systems & Tools: Odoo (ERP), MS Teams, Active Directory, PowerShell, Microsoft Server
Product/PM Tools: Gantt charts, BPMN, UML, WBS (Work Breakdown Structure), Agile/Scrum

AI & Productivity: ChatGPT, Claude, Gemini, Perplexity, Gamma (AI-assisted workflow design & prompt engineering)

PROFESSIONAL EXPERIENCE

Junior System Administrator / Service Desk Specialist
[2022–2026]

- Analyzed and documented recurring technical issues across >300 users and 1,000+ annual support requests, applying root cause analysis to identify process gaps and proposing solutions that reduced repeat tickets
 - Coordinated onboarding of new business systems (**Odoo ERP, MS Teams**) for internal stakeholders: gathered requirements, tested functionality, logged and prioritized bugs, and delivered user training — improving adoption and staff satisfaction
 - Contributed to process automation initiatives, providing operational insight to senior stakeholders to streamline manual workflows
 - Managed IT asset lifecycle (procurement → deployment → decommissioning), maintaining accountability records and optimizing resource allocation.
 - Prioritized and distributed workload across a support team, acting as informal task coordinator to meet SLA targets and maintain consistent closure rates
 - Authored internal documentation, workflows, and step-by-step guides, improving knowledge accessibility and reducing onboarding time for new team members
 - Presented performance and incident reports to senior management, supporting data-informed decision-making
-

PROJECTS

Team Lead — "e-Department" Web Application | University Capstone Project | Team of 5

- Led end-to-end delivery of an internal management system for university academic staff, from requirements gathering to launch
- Elicited and documented business requirements; modeled workflows using BPMN and UML; built project timeline via Gantt chart and WBS
- Facilitated team meetings, aligned scope with stakeholder needs, and supervised coding, testing, and documentation
- **Result:** delivered a fully functional product ranked #1 among second-year project teams

Co-Founder — IoT Location Tracking Startup (Pre-Seed MVP) | Team of 3

- Initiated product concept; conducted customer development interviews, collected user stories, and translated findings into technical requirements for a LoRaWAN/IoT-based tracking app (real-time location, SOS, geofencing)
 - Applied Lean Startup methodology to validate assumptions quickly and iterate on product scope
 - Managed relationships with technical partners; delivered monthly progress reporting to stakeholders
 - Built and presented MVP prototype at a public demo day to investors, owning the pitch narrative end-to-end
 - Directed team operations across the full product lifecycle, from ideation through post-demo iteration
-

EDUCATION

Master's Degree, Computer Science, 2024

Bachelor's Degree, Software Engineering 2023

CERTIFICATIONS & CONTINUING EDUCATION

- Google Data Analytics Professional Certificate — Coursera (*in progress*)
 - Associate SQL Analyst; Data-Driven Decision-Making (DDDM) in SQL — DataCamp
 - Product Management; Product Analytics — IAMPM
 - Product Management; Agile Scrum for Beginners + Scrum Master Certification Prep — Udemy
 - Project Management for Non-Project Managers; Project Management Foundations — Udemy
 - Business Analytics — University coursework
 - AI Audit & Architecture for Business — (*in progress*)
 - Self-directed: Prompt Engineering, AI Automation (*in progress*)
-
